

Can I Be Hacked?

This presentation is to be informative and not to promote specific products, services companies, etc. Illinois ASBO Sponsored Programs are permitted to promote products and services in accordance with the Service Associate Ethics Policy and Code of Conduct.

Introductions

Ronald Kasbohm Role: Speaker

- *Director of Technology and Business Services*
 - *Township High School District 113*
 - rkasbohm@dist113.org
 - (224) 765-1030

Barry A. Bolek. Role: Speaker

- *Professional Development Specialist*
 - *Illinois Association of School Business Officials*
 - bolekbarry@gmail.com
 - 224-430-3000

ILLINOIS ASBO ETHICS STATEMENT

This information is for the presenters only, please remove this slide before your presentation.

- The Moderator will help ensure the Illinois ASBO Code of Ethics is adhered to throughout the presentation and ensuing audience discussion.
- Moderators are given the authority to ask any attendee to leave if they become combative with presenters.
- This presentation is to be informative and not to promote specific products, services, companies, etc.
- If a vendor is a presenter and uses the presentation as a platform to “sell” their product or services, the Moderator has the authority to stop the presentation if the presenter refuses to modify their content.
- Any vendor presenter who violates these regulations may be excluded from presenting at future presentations.

SO.....CAN I BE HACKED?

YES!!!!

Why Us?

- Confidential Information Treasure Trove
 - (SSN, Direct Deposit Information, Credit Cards)
- High Bandwidth
- Overworked/Understaffed IT Staff
- Wire Transfers
- For Fun!!

Some Scary Stats

200+

days

attackers are present on a victims network before detection

Source: <http://www.fireeye.com/news-events/-press-releases/read/fireeye-releases-annual-mandiant-threat-report-on-advanced-targeted-attacks>

80

days

after detection to full recovery

Source: Infosec Institute, "The Rise of Cyber Weapons and Relative Impact on Cyberspace"

\$3

trillion

Impact of lost productivity and growth

Source: http://www.mckinsey.com/insights/business_technology/why_senior_leaders_are_the_front_line_against_cyberattacks

\$3.5

million

average cost of a data breach (15% YoY increase)

Source: <http://www.ponemon.org/blog/ponemon-institute-releases-2014-cost-of-data-breach-global-analysis>

More Scary Stats

MALWARE & VULNERABILITIES
are not the only thing to worry about

46%

of compromised systems
had **no malware** on them

FAST PHISHING ATTACKS
give you little time to react

23%

of recipients **opened phishing messages** (11% clicked on attachments)

99.9%

of exploited Vulnerabilities were used
more than a year after the CVE was
published

50%

of those who open and click
attachments do so **within the first hour**

DISTRICT #113 “HACK STORY”

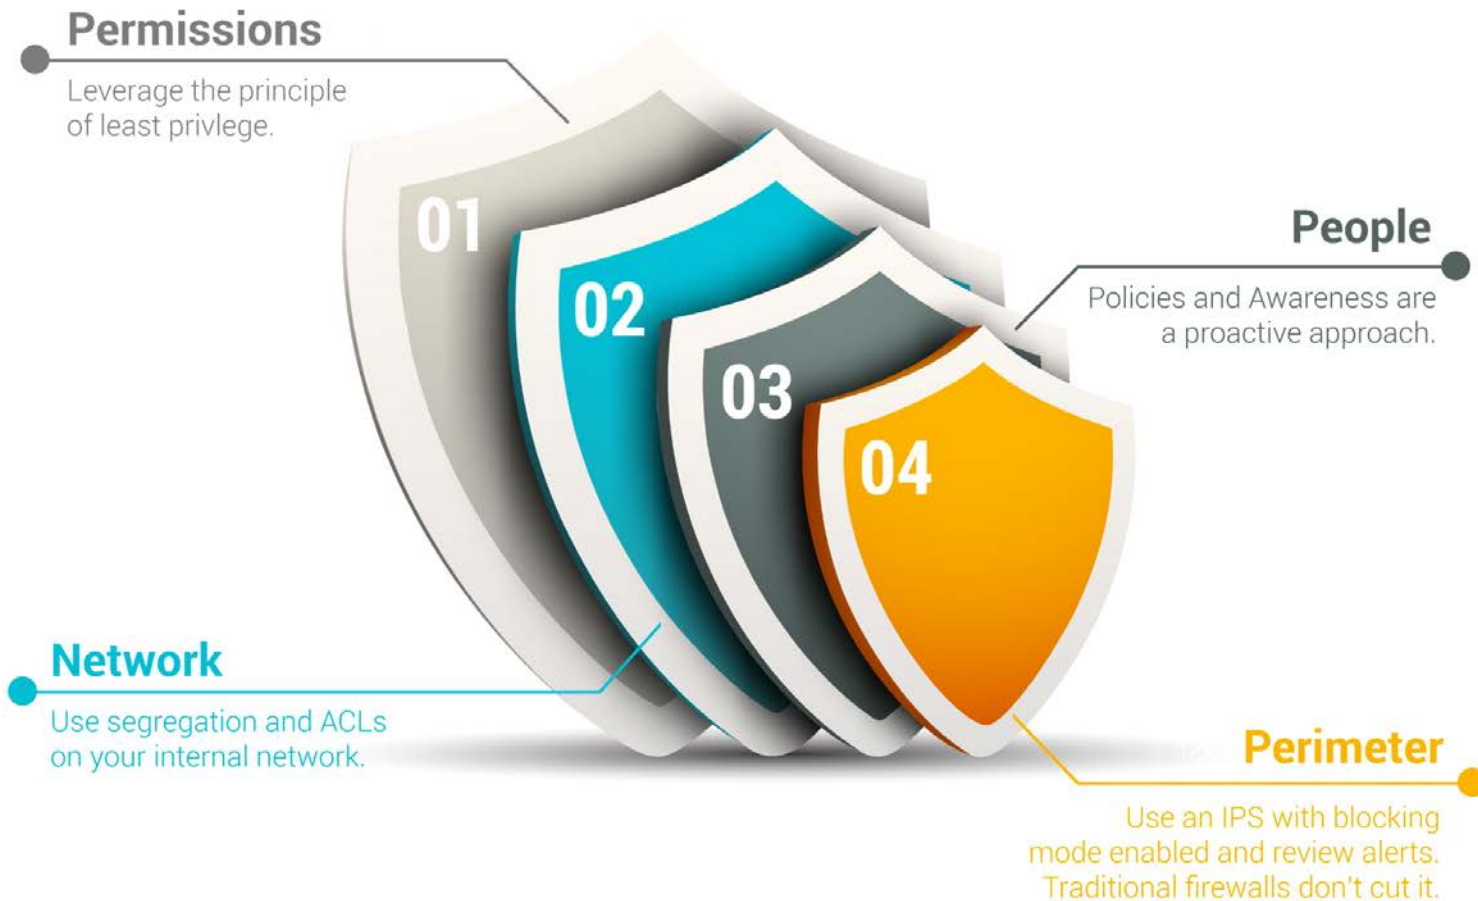

- W-2's stored on third party server
- Server hacked to gather SS#, DOB, Address and other information
- Hackers filed false Tax Returns for many employees
- Team went into action
 - Alerted CLIC/Insurance and we had coverage
 - They assigned a great company to assist with process
 - Political plan with staff
 - Legal responsibilities
 - Follow up with 1 year of protection (Experian) by law
 - Worked with Local authorities and the FBI
- What did we learn?
 - Ron is Awesome and Knows his stuff
 - Board found new respect for security
 - Funding for outside third party Security audit
 - Policy changes
 - Have some “teeth” when questioned on security... Let me tell you WHY you need to change your password and why we have dual authentication

The top 8 - 2018 cybersecurity threats:

- Cybercrime
- Fraud
- DDoS
- Ransomware
- Business Email Compromise
- Jihadist Cyber Threats
- Hacktivism
- Nation-State Threats

SO WHAT CAN I DO?

Defense in Depth

Defense

- No Silver Bullet
 - Multiple Levels of Security
 - From the “Firewall” in
- Personal Level
 - Double authentication on all email accounts
 - Credit card alerts on all transactions
 - Alerts set up on your checking accounts
 - Change passwords regularly
 - Put a STOP on your Credit

Perimeter

- Nextgen Firewalls
- Intrusion Prevention System
- Vulnerability Scanning
- Pen Test
- VPN Security

People

- Policies
 - AUP
 - IT Specific (Backup, Patching...etc)
- Plans
 - Incident Response Plan
 - Disaster Recover Plan
- Training
 - Set up regular session
 - Make it part of the “on boarding” for new employees
- Multifactor Authentication (MFA)

Network

- SIEM (Security Information and Event Management)
- Post Preach Detection
- Hard Drive Encryption
- Client Firewalls
- Client Anti-Malware
- ACL/Segmentation

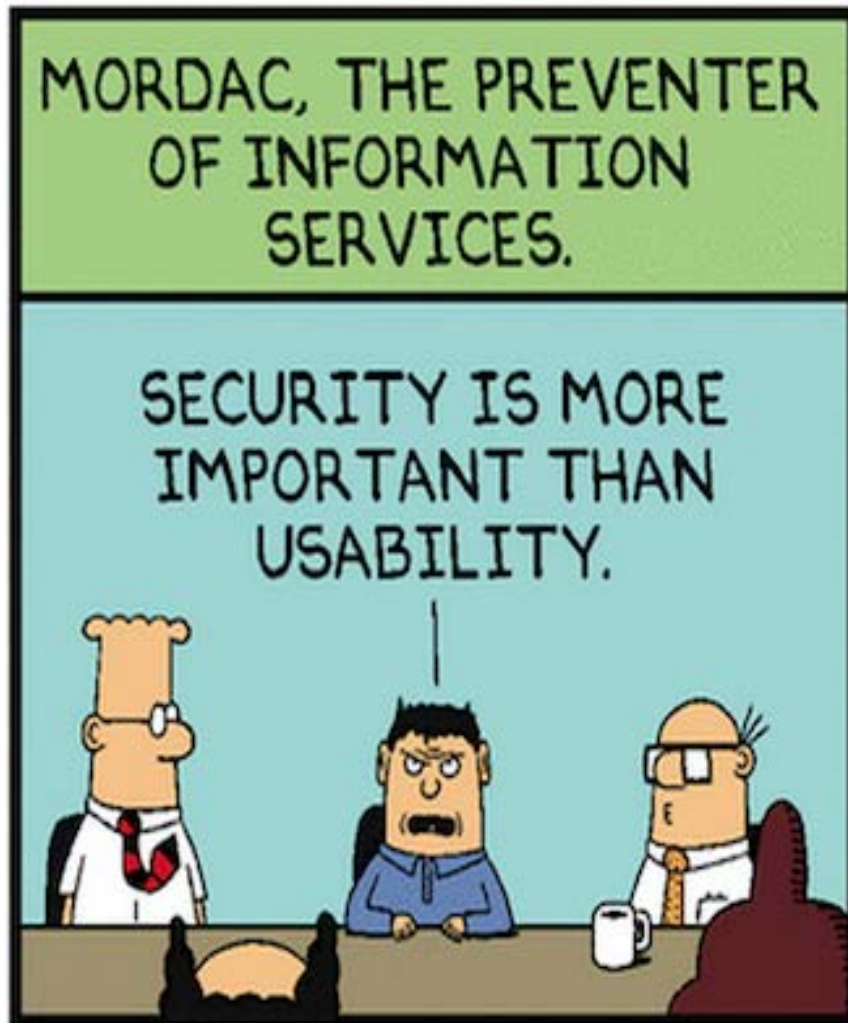

Permission

- Principle of Least Privilege
 - If they don't need it.....don't give it
- Get it into POLICY by your Board and supported by your insurance and auditors
- Run checks and balances quarterly
 - IE... payroll on Technology/Accounting
 - Review servers and file privileges
 - Review Log on files/history

Organization

- InfoSec is everyone's priority not just IT
- Division of Duties
 - IT/Security Independence
- 3rd Party Vendors
 - Right to Audit
- Security Audit
- Compliance (PCI, HIPPA..etc)

Security vs Usability

www.dilbert.com scottadams@aol.com

11-16-07 © 2007 Scott Adams, Inc./Dist. by UFS, Inc.

Security vs Usability

- Security Doesn't mean...

**It's not if you will be
Hacked....**

It is When!!!

Common Hacks to Schools

- The Superintendent email to accounting to ACH funds
- Email to staff asking to change passwords
- Sharing of Pcards... have a policy
- Lost laptop with data/information
